

## Lighting strip | WAP-LED

---

Wall backsplash profiles now with LED light.

This two part lighting strip is a modern alternative to the classic wall backsplash strips. Their slim design and colour neutral LED lighting enhances any worktop and sets new accents in lighting design. The surfaces are available in aluminium, stainless steel and all other metallic finishes. Lengths are available up to 5.00 m and of course in custom lengths. Dimming functionality is available as an option to the lighting strip.
